Poland, Krakow, 30-063 | +48 573 444 994 | vasifaliyev.work@gmail.com | <https://vasifaliyev.com>

I am a software developer with a strong proficiency in back end and front end technologies like .NET, C# and React. I have dealt with multiple web applications, as indicated in my portfolio. Notably, Vinyoxla.az is my flagship project, where I created a web application that sells Carfax records through my own API. This project has more than 500 permanent users and continues to increase sales by 15% each month without marketing costs. I also have experience in implementing complex algorithms, based on laws, ensuring clean code practices, and adhering to software design principles like SOLID and KISS. Interested in delivering high valued projects to make world better place to live in.

EXPERIENCE

FRONT END DEVELOPER at GetBot AI, Remote

June 2023 – October 2023

- Worked on UI development and dashboard features like pdf summarization.

FULL STACK WEB DEVELOPER at Garant Auto, Baku/Azerbaijan

January 2022 – October 2023

- Developed websites Vinyoxla.az, Rusum.az and Suefa.app. Maintained existing projects.
- Worked on SEO, making them appear first in search engines, used my own API to gather data.

SOFTWARE DEVELOPER on Freelance, Remote

July 2021 – October 2023

- Developed a website-catalog for a well-known brand in Azerbaijan called Ceramic City, resulting in a 10% increase in sales. Implemented SEO to make it appear at the top of search using specific keywords.
- Developed a new tool for BP AGT REGION HEALTH TEAM. Manual Risk Handling tool is developed to enhance safety of employees during work. The tool evaluates potential risks during the carriage of heavy loads based on frequency, weight, and distance, providing insights and information about what to do in case of high risk to prevent workplace accidents.
